DETAILED ACTION

Status of claims

Claims 1-14, 21, 22, and 33-41 are cancelled. Claims 15-20, 23-32, and 42-44 are pending.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15-20, 23, 25-32, and 42-44 are rejected under 35 U.S.C. 103 as being unpatentable over Taheri USPN 5,824,064 in view of Boretos et al. USPN 4,056,854.

Taheri discloses the invention substantially as claimed being a valve for implantation at a desired location within a mammal, comprising: a flexible sleeve 23 having a proximal end, a distal end and an outside surface; at least one cusp configured to permit blood flow through the at least one cusp in a single direction; at least one ring 22 comprising legs attached to the outside surface at only the proximal end of the sleeve, the at least one ring being attached to a portion of the sleeve that is not inverted; and at least one fastener extending in a direction radially outward with respect to the sleeve. See figures 2A-B and relevant portions of the specification. However, Taheri does not disclose that the ring figures 2A-B is expandable from a smaller diameter to a larger diameter.

Boretos teaches the use of an aortic heart valve comprising a base ring that is expandable in the same field of endeavor for the purpose of providing an implant that can be delivered to the implant site in a compact configuration, but expanded to the desired size at the implant site.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to combine the expandable ring of Boretos with the implant of Taheri in order to provide an expandable implant with a smaller delivery configuration.

Response to Arguments

Applicant's arguments with respect to all claims have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
